Data Visualization with Power BI and Tableau

Practical – 3

Roll No.: T017	Name: Radhika Mali
Class: TYIT	Batch: 1
Date of Assignment: 14/08/2026	Date/Time of Submission: 14/08/2026

Aim: Creating Advanced Visualizations in Tableau

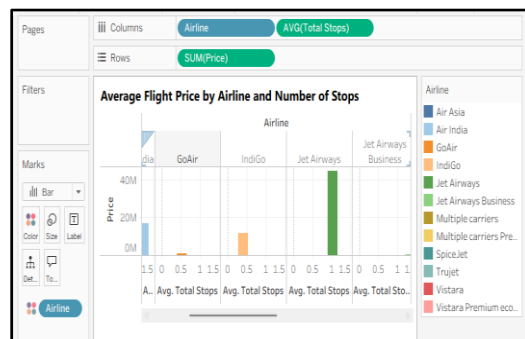

a) Create stacked and grouped bar charts for comparison

Output: stacked

Insight: Compares flights by airline and number of stops.

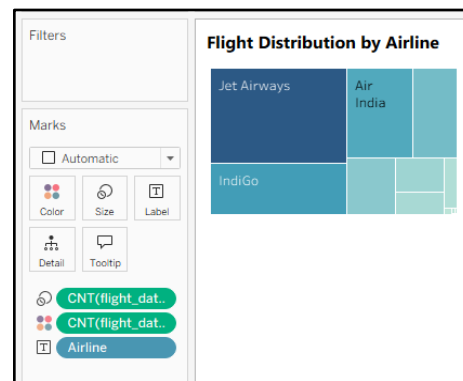

Grouped bar charts

Insight : Compares average prices by airline and stops.

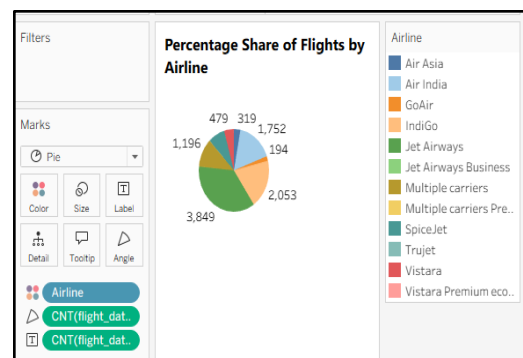

b) Build treemaps and pie charts for part-to-whole analysis

Output: treemaps

Insight: Shows each airline's share of total flights.

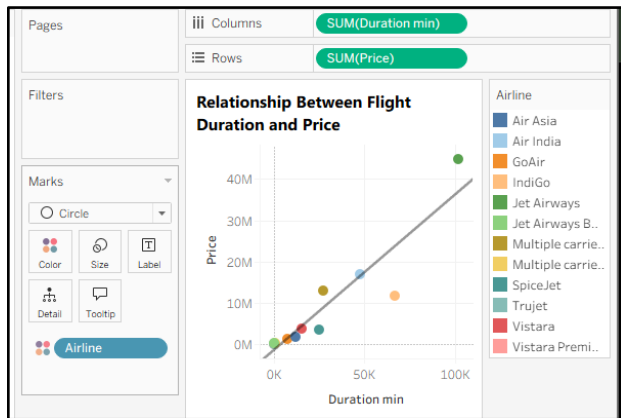

pie charts

Insight: Compares average prices by airline and stops.

c) Design scatter plots to identify relationships

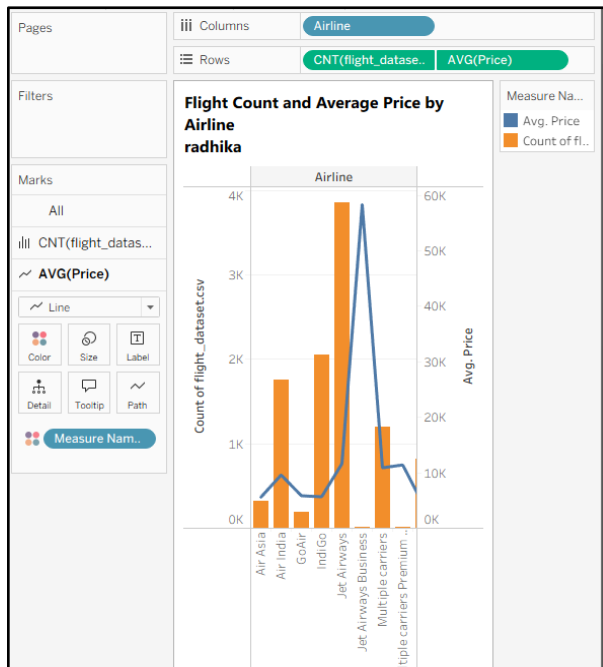

Output:

Insight: Shows the relationship between duration and price.

d) Create dual-axis and combination charts

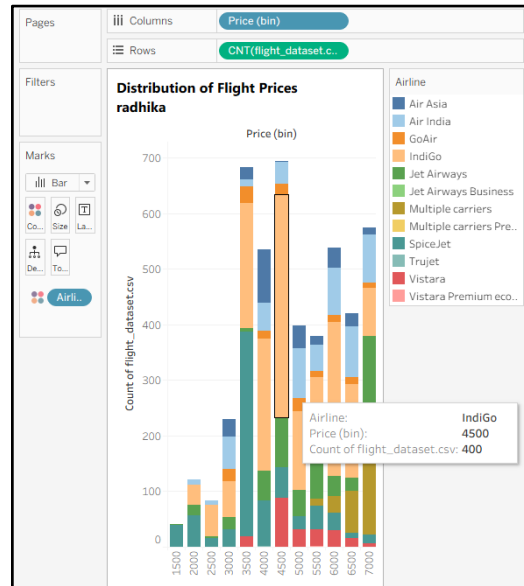

Output:

Insight: Compares flight count and average price.

e) Develop histograms for distribution analysis

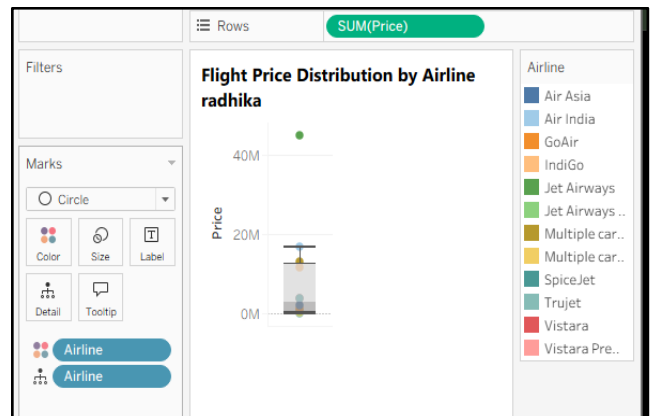

Output:

Insight: Shows the distribution of flight prices.

f) Build box-and-whisker plots

Output:

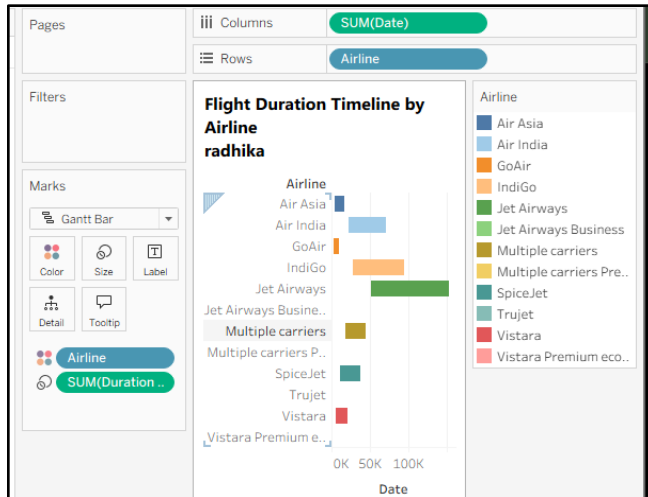

Insight: Shows price variation and outliers by airline.

g) Use Gantt charts and advanced date visualizations

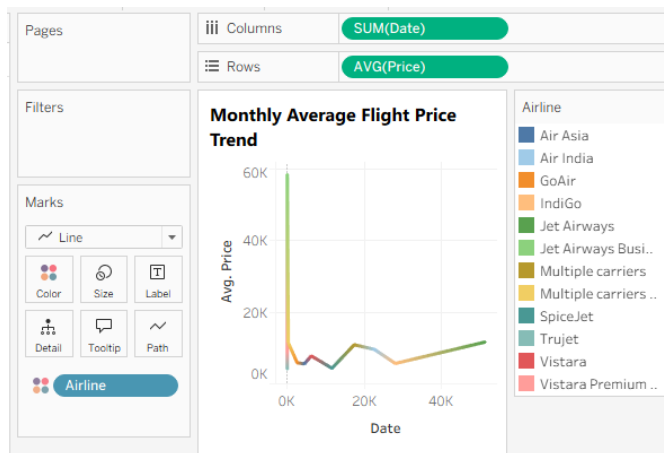

Output:

Gantt chart

Insight: Compares flight durations across airlines.

Advanced Date Visualization

Insight: Shows monthly changes in average flight prices.
